SUMMARY

Junior full stack developer specializing in Laravel, React, and RESTful APIs. I enjoy building clean, efficient, and responsive applications. Through bootcamp projects at Jobintech, I've gained experience with authentication systems, database relationships, and modern front-end interfaces using TailwindCSS and Bootstrap. I work mainly with Laravel 12, React, JavaScript, TypeScript, and MySQL, and I'm looking for opportunities to grow and contribute to meaningful projects.

Projects, Experience

Cleaning Services Platform

- Built a responsive platform showcasing cleaning services, pricing, testimonials, and promotional offers.
- Implemented smooth multi-page navigation using React Router with clean, reusable UI components.
- Designed an intuitive user experience with optimized layouts and mobile-first responsiveness.

Wathi9a App

- Built a React application to help Moroccans understand and prepare administrative documents (ID renewal, passports,).
- Developed a responsive React UI with smooth routing and persistent data via localStorage.
- Simplified complex administrative procedures, improving user experience.

EDUCATION

Full-Stack Development bootcamp Jobintech-ISEEM	08/2025 - 02/2026
--	-------------------

Bachelor's in Economics FSJES El Jadida	09/2019 - 07/2022
--	-------------------
